## **SUMMARY**

---

As a high school student, my passion for coding and finance drives me to engage in diverse programs actively, expanding my proficiency in programming and financial markets. My background as a soccer athlete instills qualities like teamwork and resilience, which I seamlessly apply to academics. I aim to excel in merging technology with finance to address real-world challenges and am eager to connect with like-minded professionals and mentors.

## **TECHNICAL SKILLS:**

- Programming Languages: Python, JavaScript
- Web Development: HTML, CSS
- Data Analysis: Microsoft Excel

## **PROFESSIONAL EXPERIENCE**

---

### **Greenwood Project**

Chicago,

IL

Greenwood Scholar

July – August 2023

I completed an intensive 6-week financial and programming training, learning Python and gaining expertise in company analysis, financial markets, statements, compliance, regulation, and valuation. Opportune to network with McDonald's, Google, and William Blair industry professionals at weekly Lunch and Learn sessions. Also, Lead a team of 5 people during the Citadel fintech competition to plan stock pitches.

### **PROJECT:**

**Stock Analysis and Visualization:** This program, analyzes historical stock data, calculates key metrics, and visualizes closing prices, which allow me to achieve 3rd place out of 100 participants in a competition hosted by Citadel. It demonstrates its effectiveness in assessing stock performance and aiding in investment strategy determination.

**StockTrader Simulator:** This program simulates a stock market, allowing users to buy and sell stocks, view their portfolios, and calculate their total value.

## **Expedia Code Nation Fellowship**

Chicago, IL

Student Intern

Oct 2023 – Present

Throughout my participation in the Expedia Fellowship, I have had the opportunity to be mentored and instructed by experienced Software Engineers and Code Nation mentors. Throughout the program, I acquired essential skills in HTML, CSS, and JavaScript, significantly enriching my knowledge and proficiency in web development.

- Working on the complexities of HTML, CSS, and JavaScript
- Excellent communication and collaboration skills, effectively working within a team environment.
- Gaining the ability to create well-structured and visually appealing web pages using HTML, CSS, and JavaScript
- Strong attention to detail, ensuring clean and error-free code.

### **PROJECT:**

Music Playlist Manager: Created a website for personalized song playlists. Integrated input forms for song details like image URL, song name, artist, and YouTube link. Employed JavaScript for input validation, link conversion, and dynamic display. Utilized CSS for layout styling and animation. Streamlined tool for playlist organization and enjoyment.

## **LEADERSHIP EXPERIENCE**

---

### **I.T CLUB**

Chicago, IL

President & Founder

Sept 2022 – Present

- Founded the I.T club to keep usable computers out of the waste stream
- I and my team repair and properly configure computers in the school
- Communicated solutions on how to address school technology's internal and external issues
- Leads and mentors club members
- Developed programs to aid in the club's effectiveness such as the Email Pickup Notifier

### **PROJECT:**

Email Pickup Notifier: The "Email Pickup Notifier" built using Python, automates the process of sending personalized email notifications to students, informing them that

their Chromebooks are ready for pickup, demonstrating the versatility and effectiveness of Python in simplifying communication tasks.

## EDUCATION & OTHER

---

CHICAGO MATH AND SCIENCE ACADEMY

GPA 2024

3.78

Top Ten GPA Of The Quarter

Worked over 40 hours in Community Service

## ADDITIONAL

---

**INTERESTS:** Soccer, Video Games, and Writing

**PROJECTS:**

Excel Countdown Timer: The project I worked on involved creating a dynamic countdown timer in Microsoft Excel. It calculates the time remaining between the current date and a specified future date, updating in real time based on the task status. This showcases my proficiency in Excel functions and provides a practical tool for tracking deadlines efficiently.
