EDUCATION

University of Illinois Urbana Champagne - Actuarial Science
May 2028

TECHNICAL SKILLS

- Programming Languages: Python, JavaScript
- Web Development: HTML, CSS
- Data Analysis: Google Sheet, Python(pandas,matplotlib)

PROJECTS

Music Playlist Manager: Created a website for personalized song playlists. Employed JavaScript for input validation, link conversion, and dynamic display. Utilized CSS for layout styling and animation. Streamlined tool for playlist organization and enjoyment.

Stock Analysis and Visualization: Earned 3rd place out of 100 participants in a competition hosted by Citade by developing a program that assesses stock performance and determines investment strategy. This program analyzes historical stock data, calculates key metrics, and visualizes closing prices.

Google Sheets Countdown Timer: Created a dynamic countdown timer that calculates the time remaining between the current date and a specified future date, updating in real-time based on the task status.

Email Pickup Notifier: The "Email Pickup Notifier" built using Python, automates the process of sending personalized email notifications to students, informing them that their Chromebooks are ready for pickup.
